

Tutorial for the access to the electures

The electures are available at <http://electures.informatik.uni-freiburg.de/>.

The access to the electures of "Optical microsystems" and "Mikrooptik" respectively is restricted. So there is on the home page <http://electures.informatik.uni-freiburg.de/catalog/course.do?courseId=mikrooptikws0708> the following hint below the title „Mikrooptik WS2007/08, Prof. Dr. Hans Zappe“:

„Access to the learning content is only allowed for computers from the IP range of the University of Freiburg.“

Thus you can access the electures with the **computers** in the **CIP-Pools**.

But you can connect **your computer** to the network of the University of Freiburg too.

- A) There is a German tutorial, how to connect your **notebook** with the **WLAN of the University of Freiburg**, at <http://mopoinfo.vpn.uni-freiburg.de/>
- „net access tutorials“
 - <your operating system>
 - from „1. Voraussetzungen“ to „4. IPSec einrichten“.

After the installation it should be possible to establish a connection to the network.

- B) **At home** you can connect your computer (or notebook, which will be not connected to the WLANuni-fr) to the network of the University of Freiburg in the following way:
At <http://mopoinfo.vpn.uni-freiburg.de/>
- „net access tutorials“
 - <your operating system>
 - Use the German tutorial from „3. MoPo-Zertifikat erstellen“ to „4. IPSec einrichten“.

After the installation it should be possible to establish a connection to the network.

Maybe there will be English tutorials at <http://mopoinfo.vpn.uni-freiburg.de/>.

If you have any problems, please have a look at <http://mopoinfo.vpn.uni-freiburg.de/>
→ „about MoPo“ → „news“
or use the "MoPo-Mailingliste" at
→ „net access tutorials“ → <your operating system> → „5. Support & Aktuelles“.

If you still have any questions, don't hesitate to contact the MoPoManager by
→ „Support“ → „MoPo IRC“.

Now it should be possible to access the electures at
<http://electures.informatik.uni-freiburg.de/catalog/course.do?courseId=mikrooptikws0708>.

More information about the electures you will get at <http://electures.informatik.uni-freiburg.de/catalog/software.do> and <http://electures.informatik.uni-freiburg.de/catalog/contact.do>.
